

moneo

The software made for industrial evolution. Not more. Not less.

ARE YOU READY FOR INDUSTRIAL EVOLUTION?

Yes, you are. With moneo. Experience the ease of IT-supported process optimisation with the new all-in-one software platform. Minimise maintenance times and maximise machine uptime and efficiency. And yet, moneo has so much more to offer. For all industries. Without any detours nor technical obstacles. Simple and without any complications.

ONE PLATFORM FOR ALL REQUIREMENTS

- UNCOMPLICATED
PLANT MONITORING
- USER-FRIENDLY SENSOR
PARAMETER SETTING
- CONVENIENT
REAL-TIME MAINTENANCE
- INTELLIGENT WARNING
AND ALARM SYSTEM

INTERACT NOW WITH YOUR PLANT

Is the temperature in my production process correct? Is the vibration behaviour of my motor within the normal range? Are the valves still okay? Just a few clicks, and moneo will answer these questions. The software platform uses and focuses the power of digital information generated by smart IO-Link sensors and makes it available to you as a solid basis for decision-making while indicating the need for action to warn you before it is too late. Planning maintenance according to the requirements can be so easy, ensuring future machine uptime so efficient and real-time maintenance so convenient.

However, moneo is not a one-way street; gathering information is just part of the whole. For example, you communicate with your installation, readjust sensor parameters with just a few clicks and transfer them directly to the sensors with just one additional click. This is how simple process optimisation can be while ensuring the efficiency of your plant.

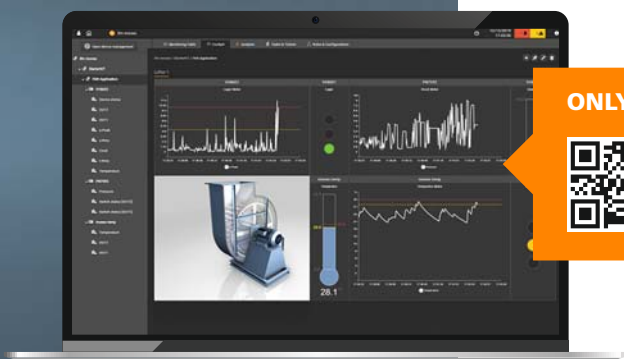

EVERYTHING YOU NEED. NOT MORE, NOT LESS.

Is it too much or still not enough? No worries! With all its functions, moneo will fully adapt to your requirements and expectations. With its modular structure, the software offers all the support you need – you can decide for yourself how much of it you wish to use. Just give it a try. Experience for real what others are still just trying to put into words. Use moneo to increase information while decreasing downtime. Raise your plant efficiency to the next level. Start your personal industrial evolution now!
